OBJECTIVE

I seek challenging opportunities where I can fully use my skills for the success of the organization.

ABOUT ME

I am a software engineer with a great ability to understand and build complex systems and Websites.

And I am Backend WEB developer(PHP Laravel) with more than one year of experience .

I have knowledge in software engineering In addition to more than five years of experience and knowledge in network engineering and management, design and implementation.

I changed my career path from the field of networking to programming and web development because I love challenges and I also love programming and dealing with code, whatever the programming language used or required.

I worked in many different companies on many different projects in my previous field, which gave me experience in communication and working within a team.

I also look forward to developing myself in the field of web development to add the greatest possible value to the organization
